Troubleshooting......12-13

Tips
1. After a period of use, it is normal for the machine to change color at the bottom. This does not affect the operation of the machine.
2. Please follow all operating instructions, do not select the wrong function key (such as use “wet” function for dry bean). Otherwise, the color of the container may change.
3. Please follow the instructions for adding the correct amounts of ingredients and water into the soymilk maker. Otherwise, inaccurate amounts may negatively affect the taste of the food or beverage.
4. Food products not mentioned in the manual should not be added. The machine may become discolored as a result, or the machine could become burnt, or the food will not blend properly.

左边: SAFTY NOTES
右边:
Please follow the safety precautions to avoid any harm to yourself and cause any damages
Never       Always       Warning       Attention

● This product is limited to family use. Please do not use for commercial purposes.
● Please read the manual carefully before using the machine and keep the manual for future references.
● Never use this machine on unstable or inclined surfaces.
● Do not use the machine when empty or overloaded.
● Please confirm the voltage of the power before use to ensure that the machine is compatible with the power source.
● Never hook the power cord on any sharp or movable items.
● When operating the machine, please make sure there is proper distance between the power outlet and other electronics. Also, keep the plug within a reachable distance to remove it if necessary.
● Power should be well grounded and kept away from flammable items.
● Do not use the other accessories when the machine is in use to avoid causing fire or injury.
● If there are damages to the power cord, plug, and other parts of the machine, stops using immediately. Please bring the machine to the manufacturer or dealer for repairs or help from a professional technician.
● When in use, please do not touch the blades or any operating parts of the machine.
Do not touch the parts of the machine being heated to avoid injury.
Please unplug after use.
Please make sure children are not operating or touching the machine while in use.
When not in use, such as pouring, washing or any other usage, please unplug.
Careful with the sharp blades when washing or operating.
Please wash after use.
When washing the machine, do not submerge the head of the machine in water. Please dry the plugs and outlets after washing and make sure they are dry before use.

OPERATION NOTES
Please pay attention to the following:
• Before use, please place the head of the machine in the correct position and ensure the head is properly placed onto the body of the machine. Otherwise, the machine will not operate properly.
• During operation, please avoid unplugging the machine. In case of a power outage, there may be consequences as follows:
  ■ Alter the taste of finished food or beverages.
  ■ Overflow of the food or beverages, as well as warning to stop working.
  ■ When making paste or porridge, the bottom may burn and stick.
• During operation, please do not add additional food or beverages in the machine.
• During operation, please do not remove the head of the machine. Doing so may cause injury or harm to people or the machine.
• Please do not use the machine to reheat beverages, such as soymilk, porridge or boil water.
• If the bottom of the machine is burnt, please use a stainless steel brush to clean and use as normal.

LEFT SIDE: OPERATION NOTES

- Please take out plastic cup before use.
- Wash the parts of the machine that will be in contact with food thoroughly.
- This product can make: dry beans soymilk, soaked beans soymilk, rice paste, mixed beans porridge, green bean paste, juice, clean and blending functions.
- Accessories note: Soymilk cup can be used to hold soymilk after the filter is used to screen out the residue. (Please refer to image No. 1 for installing the cup handle. Insert the long end of the handle into the bottom of the cup and the short end into the top of the cup. Adjust to ensure the handle was properly installed. The cup is to hold the filtered soymilk.

DRIED BEANS SOY MILK

1. Please use the small measuring cup provided to measure the required amount of ingredients. Place the beans into the machine and add in cold water until the combined water and beans level is between the maximum and minimum water lines (If the water level exceeds the maximum line or falls below the minimum line, it may affect the quality of the soy milk.)
2. Please attach the head of the machine firmly on to the machine body, making sure the power is properly connected.
3. After attaching the power cord to the machine, the menu panel will flash, indicating the machine is ready to function. Press down the “SELECT” key, the indicator on the control panel keep blinking, which means that the machine is in the working mode. Select the cooking mode you wish to make and press the “START/STOP” key, the machine will automatically be in cooking mode. If you want to stop operation, please press the “START/STOP” key again.

RIGHT SIDE: OPERATION NOTES
4. Press the “SELECT” key to choose the “DRY BEANS” key, which will light up. Press “START/STOP” key to begin and the machine will automatically go into dry beans blending mode. After the heating plate heats the soybeans for a few minutes, the blades will begin to blend the dry beans. After around 20 minutes, the machine will alert you with a “Dee-Dee” sound and the dry beans selection will flash. This indicates the soymilk is ready.

5. Please remove the power cord after the soymilk is finished, lift up the head of the machine and pour the soymilk mixture into the filter to remove the residue. The soymilk is ready to enjoy after filtering. Feel free to add in sugar after the soymilk is finished.

Please DO NOT add in sugar in the machine while cooking.

Soaked beans soymilk
1. Please use the measuring cup provided to measure out a cup of soybeans. Soak the dry beans in cold water. Soak in water 20°C+ for 6 to 8 hours, 20°C- for 8 to 10 hours.
2. Please use the soaked beans into the body of the machine and add cold water. The combined ingredients cannot exceed the maximum water level and cannot be less than the minimum water level. (If the water level exceeds the maximum line or falls below the minimum line, it may affect the quality of the soymilk.)
3. Please attach the head of the machine firmly on to the machine body, making sure the power is properly connected.

4. After attaching the power cord to the machine, the menu panel will flash, indicating the machine is ready to function. Press down the “SELECT” key, the indicator on the control panel keep blinking, which means that the machine is in the working mode. Select the cooking mode you wish to make and press the “START/STOP” key, the machine will automatically be in cooking mode. If you want to stop operation, please press the “START/STOP” key again.

5. Press the “SELECT” key to choose the “SOAKED BEANS” key, which will light up. Press “START/STOP” key to begin and the machine will automatically go into soaked beans blending mode. After the heating plate heats the soybeans for a few minutes, the blades will begin to blend the dry beans. After around 20 minutes, the machine will alert you with a “Dee-Dee” sound and the soaked beans selection will flash. This indicates the soymilk is ready.

6. Please remove the power cord after the soymilk is finished, lift up the head of the machine and pour the soymilk mixture into the filter to remove the residue. The soymilk is ready to enjoy after filtering. Feel free to add in sugar after the soymilk is finished.

Tips:
Dry and soaked beans soymilk function can also make flavored soymilk using fruits and vegetables. Use half a measuring cup of soybeans and half cup of the other ingredients and select the same functions as you would for normal soymilk.

Mixed Beans Porridge/Rice Paste

1. Please use the measuring cup provided to measure out the ingredients for the mixed beans porridge or rice. Wash the ingredients and place in the body of the machine. Add water along with the porridge ingredients until the ingredients level is between the maximum and minimum water level. (If the water level exceeds the maximum line or falls below the minimum line, it may affect the quality of the finished product.)
2. Please attach the head of the machine firmly on to the machine body, making sure the power is properly
After attaching the power cord to the machine, the menu panel will flash, indicating the machine is ready to function. Press down the “SELECT” key, the indicator on the control panel keep blinking, which means that the machine is in the working mode. Select the cooking mode you wish to make and press the “START/STOP” key, the machine will automatically be in cooking mode. If you want to stop operation, please press the “START/STOP” key again.

Press the “SELECT” key to choose the “MIXED BEANS PORRIDGE” or “RICE PASTE” key, which will light up. Press “START/STOP” key to begin and the machine will automatically go into mixed beans porridge/rice paste blending mode. After the heating plate heats the beans or rice for a few minutes, the blades will begin to blend the beans or rice. After around 20 minutes, the machine will alert you with a “Dee-Dee” sound and the mixed beans porridge/rice paste selection will flash. This indicates the porridge/rice paste is ready.

After the mixed beans porridge/rice paste is finished, please unplug immediately. After 30 seconds, remove the head of the machine and pour out the mixed beans porridge/rice paste after cooling.

Note: Please add sugar after cooking the mixed beans porridge/rice paste.

Green Bean Paste/Red Bean Paste

1. Please use the measuring cup provided to measure out the green beans/red beans. Wash the beans and place in the body of the machine. Add water along with the beans until the water level is between the maximum and minimum water level. (If the water level exceeds the maximum line or falls below the minimum line, it may affect the quality of the finished product.)
2. Please attach the head of the machine firmly on to the machine body, making sure the power is properly connected.
3. After attaching the power cord to the machine, the menu panel will flash, indicating the machine is ready to function. Press down the “SELECT” key, the indicator on the control panel keep blinking, which means that the machine is in the working mode. Select the cooking mode you wish to make and press the “START/STOP” key, the machine will automatically be in cooking mode. If you want to stop operation, please press the “START/STOP” key again.
4. Press the “SELECT” key to choose the “Green Bean Paste” key, which will light up. Press “START/STOP” key to begin and the machine will automatically go into green/red bean paste blending mode. After the heating plate heats the beans for a few minutes, the blades will begin to blend the beans. After around 20 minutes, the machine will alert you with a “Dee-Dee” sound and the green/red beans paste selection will flash. This indicates the green/red bean paste is ready.
5. After the green/red bean paste is finished, please unplug immediately. After 30 seconds, remove the head of the machine and pour out the green/red bean paste.

Note: Please add sugar after cooking the mixed beans porridge/rice paste.

Fruit Juice/Blender

1. Fruit Juice: Please cut the desired fruit into very small pieces and place into the machine. Add other ingredients and water until the ingredients is between the maximum and minimum water level. Plug the power cord into the machine and select “BLENDER & CLEAN” mode. Then press “START/STOP” key to start the blending. After 2 to 3 minutes, the fruit juice will be finished.
2. **Blender:** After the soymilk or bean paste is finished and you wish to add in sugar, salt or other condiments, select the “BLENDER/CLEAN” function, then press “START/STOP” key to mix the ingredients together. After 2 to 3 minutes, the mixture will be completed.

3. **Fruit Juice recommendations:**
   - **Banana milkshake:**
     - Ingredients: Peeled banana, cut into small pieces and yogurt
   - **Honeydew milkshake:**
     - Ingredients: Honeydew with seeds/skin removed, cut into small pieces, yogurt, sugar to taste
   - **Orange Juice:**
     - Ingredients: Peeled orange, sugar to taste

**Tips:**
The soymilk maker is not a juice processor, so there may be incidents where there are large chunks of fruit remaining that cannot be blended.

### CLEANING & MAINTENANCE

**Left:**

Cleaning: After use, please clean immediately, please refer to the following:

1. Unplug and remove the head of the machine from the body. Rinse the head of the machine, but do not submerge.
2. Please wash the sensor rods, the blades and the blade rod thoroughly. **WARNING:** The top of the head of the machine CANNOT be washed. Wipe down with a damp towel.
3. Use the brush to wash parts that cannot be rinsed under the tap.
4. Wash soymilk cup under tap.
5. Dry after washing.
6. **Reminder:** Careful of sharp blades!
   - **Warning:** DO NOT put in dishwasher or microwave.

**Right:**

Maintenance:
1. Please use frequently to keep motor running.
2. Keep in dry, cool area if you do not use the machine for a long period of time.
